### RUBBER OUTSOLE SCUFF CAPS EVO

It is obvious that the heavy duty pattern of this hard-wearing, up to 300°C heat resistant HRO rubber outsole has been designed for optimum safety and performance, especially on unsecured grounds.

### SCUFF CAP

Extra high scuff cap for wearers who kneel a lot during their work.

### VOLUME PLUS<sup>48</sup>

The special shape of the last provides more space to the small toes and the ball of the foot. This extra comfort is available up to size 48.

### DISC

The original disc lacing system and for its 30th anniversary now also available in PUMA safety shoes. What differs from other systems is that turning the disc to the right will lace up the shoe, turning it half to the left will open the fastener again. So easy, so effective. The PUMA Disc can also be optimally operated with gloves.
