XPR PROTECT SOLE

Our absolute lightweight! The XPR PROTECT sole is more than 100 g lighter than conventional safety shoe soles, but without compromising on protection and durability. The innovative, elastic and ultralight XPR. offers outstanding impact cushioning and keeps you on a firm footing, even in the harshest environments. The eye-catching sole profile optimizes traction and improves stability.

EVA FOOTBED

The anatomically shaped footbed made of soft EVA has shock-absorbent properties that improve the protection of joints, muscles and bones. Ergonomic longitudinal arch support delivers optimized stability, while the textured section on the ball massages the front of the foot with every step. The perforation improves breathability – to pleasantly optimize comfort.

FAP[®] LITE - FLEXIBLE ANTI-PERFORATION

The latest generation of metal-free perforation protection:

- 50% lighter
- very high flexibility
- better cushioning and pressure elasticity
- cooling effect through breathability and sweat absorption

SAFETY KNIT[®]

STEP IN COMFORT - The ultraflexible textile fabric perfectly adapts to the foot and fits like a sock. The upper SAFETY KNIT[®], a mixture of high quality synthetic fibres, offers a high flexibility, resistance and breathability at the same time
