SLIP RESISTANT XTS TRAIL OUTSOLE

The easy-to-clean rubber outsole ensures perfect contact with the ground. It is non-slip and abrasion-proof and heat-resistant up to 300°C (HRO). The specially designed cleat profile and the wide flex grooves guarantee optimal flexion, optimize the water-displacing properties (windshield wiper effect) and provide a secure hold on a wide variety of surfaces.

comfit[®] AIR FOOTBED

The newly developed, breathable ALBATROS[®] comfit[®] AIR footbed has elevations in the heel and ball area of the foot as well as a support of the longitudinal arch. This helps the foot keeping its natural position in the shoe and stimulates the musculature while walking. The slip-resistant textile cover is odour-resistant, moisture absorbing and washable at 30°C.

IMPULSE.FOAM[®] midsole

Ultimate comfort during long working days. The innovative IMPULSE.FOAM[®] midsole in two different densities reacts to each of your steps with an energy impulse. Thereby the IMPULSE.FOAM[®] does not only return the energy, but also provides maximum cushioning and excellent stability.

FIBERGLASS TOE CAP

Fiberglass reinforced composite toe cap with more space for the toes, lighter than a common steel cap, antimagnetic and thermally insulating.
