ESSENTIALS+ OUTSOLE

The sporty outsole offers perfect ground contact and non-slip walking thanks to the specially arranged profiled elements. Flex grooves ensure optimum mobility and also save weight. The distinctive heel provides an excellent grip on ladders.

COMFIT®VIVA

The anatomically shaped footbed made of soft EVA has shock absorbent properties that improve the protection of joints, muscles and bones. The ergonomic longitudinal arch support delivers optimized stability, while the textured section on the ball massages the front of the foot with every step. The perforations improve breathability – to pleasantly optimize comfort.

CUSHIONING MIDSOLE

The soft midsole optimally absorbs the high forces of a footstep and perfectly combines stability and flexibility.

PROTECTION

Tough inside - sleek on the outside: compact metallic toe cap design for a sporty look and metallic antiperforation protection.
