

## VORTEX IMPULSE MID S1PS ESD FO HRO SR

Art. Nr. 63.641.0

- Protection:** fiberglass toe cap and flexible FAP<sup>®</sup> LITE midsole
- Plus:** ESD, metal free, breathable functional lining, comfortably-padded collar and dust tongue
- Upper:** SAFTEYKNIT<sup>®</sup> with FITFRAME<sup>®</sup>-Elements
- Lining:** breathable functional lining
- Footbed:** anatomically formed comfit<sup>®</sup> AIR footbed
- Sole:** DUAL.IMPULSE - 300°C heat and slipresistant rubber outsole with double foamed IMPULSE.FOAM<sup>®</sup> midsole in two different densities for maximum cushioning, stability and comfort
- Colour:** grey-blue
- Sizes:** 36 - 47

Also available:

ENERGY IMPULSE GRAY LOW  
646660

VIGOR IMPULSE LOW  
646500

### DUAL IMPULSE SLIP RESISTANT OUTSOLE

The easy to clean rubber outsole ensures perfect ground contact. It is non-slip and abrasion resistant as well as heat resistant up to 300°C (HRO). The specially designed cleat profile and the wide flex grooves guarantee optimum flexion, optimize the water-displacing properties (windscreen wiper effect) and provide firm grip on a wide variety of grounds.

### comfit<sup>®</sup> AIR FOOTBED

The newly developed, breathable ALBATROS<sup>®</sup> comfit<sup>®</sup> AIR footbed has elevations in the heel and ball area of the foot as well as a support of the longitudinal arch. This helps the foot keeping its natural position in the shoe and stimulates the musculature while walking. The slip-resistant textile cover is odour-resistant, moisture absorbing and washable at 30°C.

### IMPULSE.FOAM<sup>®</sup> midsole

Ultimate comfort during long working days. The innovative IMPULSE.FOAM<sup>®</sup> midsole in two different densities reacts to each of your steps with an energy impulse. Thereby the IMPULSE.FOAM<sup>®</sup> does not only return the energy, but also provides maximum cushioning and excellent stability.

### FAP<sup>®</sup> LITE - Flexible Anti Penetration

The latest generation of metal-free penetration protections:

- 50% lighter
- very high flexibility
- better cushioning and pressure elasticity
- cooling effect through breathability and sweat absorption
